- Dual front airbags and front seat-mounted side airbags
- Personal Safety System™
- Tire Pressure Monitoring System
- SOS Post-Crash Alert System™ that flashes signal lights and sounds horn in the event of an accident

**Did you know?** The new Mustang offers customers selectable steering that tailors the driving experience to fit their needs. With a choice of three settings, the feature allows the customer to select the steering effort, depending on his or her style of driving.

## TRACK APPS ▶

2014 Ford Mustang technologies include an available 4.2-inch LCD productivity screen for access to important information such as fuel economy and vehicle performance. Track Apps is a unique Mustang feature, delivering performance metrics for drivers while at a track. The screen displays g-forces, acceleration times, braking times and countdown starts – a great convenience for enthusiasts.

## PERFORMANCE ▶

The GT Track Package gives that extra edge to customers who want to push their Mustang even further on the track. The package includes an engine cooler, upgraded radiator, performance friction brake pads and a Torsen® differential. Other optional packages include the Brembo Brake Package, which is available on Mustang GT; the V6 Performance Package is available on V6 Mustangs.
